MH300L DT23

제품명	MH300L DT23 (DN8CFL)
컨셉	현대 소나타 택시 전용 PBV IVI
향지	내수

주요 기능	상세 설명
Kakao Taxi Driver Service	Enables drivers to accept ride requests directly within the IVI without using a smartphone, improving convenience and operational stability. It also enhances the in-vehicle button linkage experience and supports seamless service operation.
TMAP NAVIGATION	Integrates TMAP's IVI version optimized for taxi drivers. Provides real-time traffic information and optimal route guidance for taxi operations, delivering higher efficiency than OE-level navigation.
Taxi Meter Integration (App Meter / DIG)	Replaces existing physical meters and DTG with an integrated digital meter within the IVI. Supports fare information display and card payment integration, simplifying taxi operation.
42dot Driver Authentication	Supports driver authentication through the 42dot platform, enabling business operations at OE-level standards and offering enhanced security and identity verification for professional drivers.
OTT Streaming Service (HYUNDAI TV+)	A FAST-type streaming service providing free real-time channels and ad-supported content. Allows drivers to watch news and entertainment during breaks and offers specialized infotainment features for taxi use.
